

6516207598.txt

I travel both for my job and for pleasure and XM Instant Traffic and weather is a great way for me to have traffic and weather reports for areas both in preparation for a trip and for the time I'm in town. XM Instant Traffic and weather is especially helpful when I've never been to that city before and don't know the local stations. Instead of flipping through all of the AM stations until I get the "Traffic on the Twos", I can just tune into the XM station. Please don't take away my XM Instant Traffic & weather - reject the NAB's petition 04-160.

Thank you,
Robin M. Neff
